About: *LMS- Learning Management System*

LMS is a full web based E learning system to support GDC's digital growth. This web application will allow teachers and students to access the data of teaching & learning online through their login also teachers can upload the data as and when required.

It is the system which enables teachers to preserve their conventional teaching method i.e chalk & board and at the same time digitalize it, so that it can be saved and reused.

This system is an initiative of IQAC and DET cell of GDCH , Nagpur to make teachers and students learn & utilize this system in day to day practice and thus making Teaching – Learning an interesting process.

Objectives:

1. To introduce LMS (Learning management System)
2. Practical application of LMS for Faculty.
3. Practical application of LMS for students.
